estimate ranges in Table 3, and the costs for greenfield projects in Table 4. All averages are based on the estimates provided by the Utilities.

**Table 2: Conversion Costs per Mile** 

Type of Facility	Urban	Suburban	Rural
Heavy Commercial District/Boulevard*	\$3,000,000 (max.) \$1,314,000 (min.) <b>\$2,053,000 (avg.)</b>	Not Applicable	Not Applicable
Three Phase Bulk Feeder	Included Above	\$2,770,000 (max.) \$ 893,000 (min.) \$1,520,000 (avg.)	\$994,000 (max.) \$370,000 (min.) <b>\$590,000 (avg.)</b>
Three Phase Primary Tap	Included Above	\$1,680,000 (max.) \$ 518,000 (min.) \$ 938,000 (avg.)	\$775,000 (max.) \$200,500 (min.) <b>\$456,000 (avg.)</b>
Single Phase Primary Tap	Not Applicable	\$ 438,000 (max.) \$ 220,000 (min.) \$ 350,000 (avg.)	\$290,000 (max.) \$151,000 (min.) <b>\$218,000 (avg.)</b>
Residential Service Drops (cost per service)	Not Applicable	\$ 2,333 (max.) \$ 923 (min.) \$ 1,481 (avg.)	\$ 3,977 (max.) \$ 1,432 (min.) \$ 2,346 (avg.)

<sup>\*</sup> The estimates for converting a heavy commercial urban district are based on actual projects recently completed by the Utilities.
